

Adaptation Match

 First write the name of the animal and its natural habitat. Then look carefully at each animal. Does the animal have any of the physical adaptations listed at the bottom of the page? Pick the **three** most important adaptations for survival that you can see. Write them in the space provided below. Try to figure out how each adaptation helps the animal survive, and write it down.

Animal Name: _____ **Habitat:** _____

Physical Adaptation

How Does It Help?
